DIPLOMA IN DATA ANALYSIS

Classroom / Virtual mode

Integrate Analyze Visualize

The term analysis refers to the discovery of significant patterns in the data and is one of the steps in the data life cycle of raw data collection. Preparing pattern information analysis to synthesize knowledge and action for produce value, as shown in this diagram, analysis is the entire process of data collection, extraction transformation, analysis interpretation and reporting includes statistical analysis as one of the subsequent steps, the most recent one stated that analytics is used to refer to the methods, their implementations in tools and the results of the use of the tools such as The analysis process is the synthesis of knowledge from the information.

01 Data Analytics provides a subtle way to analyze the data in a qualitative and quantitative manner to draw logical conclusions. Gone are the days where one must think about gathering the data and saving the data to form the clusters. For the next few years, it's all about Data Analytics and it's techniques to boost the modern era technologies such as Machine learning and Artificial Intelligence.

02 Well structured, build the learning experience, allowed for continuity of experiences as the learner progresses and grows. Apollo Medskills & ExcelR, **eLearning platform** provides the complete course videos on all topics in the agenda recorded from renowned Data Scientist from ISB. Self-paced videos which helps to learn, revise and recap the concepts.

03 The program curriculum provides extensive knowledge of Data Collection, Extraction, Cleansing, Exploration, and Transformation. Alongside the Data Mining, Data Integration is done with feature Engineering to build Prediction models for Data Visualization and deploying the solution. You name the skill set and our trainers are always there to handle the new generation tools with latest versions.

04 As a part of the Data Analytics training, the range of skills and tools that are emphasized in the course include **Tableau, Power BI, Advance Excel, SAS** and other important topics.

Eligibility : +2, Any Graduate

Duration: 160 Hours

Course Completion Certificate : Apollo Medskills + ExcelR
