

Leading SAFe®
Applying a Lean-Agile mindset with SAFe
with SAFe® 4 Agilist Certification
based on version 4.6 of SAFe

During this two-day course, attendees will gain the knowledge necessary to lead a Lean-Agile enterprise by leveraging the Scaled Agile Framework® (SAFe®), and its underlying principles derived from Lean, systems thinking, Agile development, product development flow, and DevOps. They will discuss the five competencies needed to become a Lean Enterprise. They will also learn and practice the skills for supporting and executing PI Planning events, and coordinating multiple Agile Release Trains (ARTs).

Attendees will gain an understanding of the Lean-Agile mind-set, why it's so effective in today's adapt-or-die marketplace, and what it means to lead a Lean-Agile transformation. They'll also learn how to build and support Agile teams and programs, empower a Lean Portfolio, build a Continuous Delivery Pipeline and DevOps culture, and coordinate large solutions. They will develop a skillset that's in demand worldwide—and empower their enterprises to succeed in a disruptive marketplace—when they become a SAFe® 4 Agilist (SA).

Attending the class prepares individuals to take the exam and become a certified SAFe® Agilist (SA)
